### **MORE MASSIVE SULPHIDES INTERSECTED AT MILLSTREAM'S POTTER PROPERTY**

Toronto, Ontario, Millstream Mines Ltd. (MLM -TSX-V; NJD - Frankfurt) is pleased to report that its third drill hole, S07-02, at the Potter Property has intersected Massive sulphides; thereby further enhancing the property's potentially rich VMS type deposit.

Core intervals have been prepared and submitted for assay at Swastika Labs of Ontario.

The Potter Mine Property is host to a copper-zinc-cobalt VMS deposit located in the highly prolific Abitibi Greenstone Belt in the Kidd-Munro Assemblage near the town of Matheson in north eastern Ontario, Canada.

Management has reviewed this report and press release with the company's consultant Edward Bettiol, P. Eng, who is the designated qualified person for the property.

The principle objective of Millstream Mines Ltd. is to enhance and develop known mineral properties to production potential.
