**MILLSTREAM INTERSECTS 23.75 METRES OF 3.51% COPPER & 3.44% ZINC**

Toronto, Ontario, Millstream Mines Ltd. (MLM-TSX-V; NJD- Frankfurt) is pleased to report that its on-going diamond drill program at its Potter property continues to achieve superb drilling results. In its latest drill hole, S-07-08 returned the following great values as outlined in the table below:

<b>Hole No.</b>	<b>From</b> (metres)	<b>To</b>	<b>Core Length</b> (metres)	<b>Cu</b> (%)	<b>Zn</b> (%)	<b>Co</b> (%)	<b>Ag</b> (oz/T)
<b>S-07-08</b>							
<b>Interval*</b>	674.25	698.00	23.75	3.51	3.44	0.042	0.62

GOLD ASSAYS NOT INCLUDED; ALL ASSAYS OBTAINED FROM SWASTIKA LABS, ONTARIO

\* The above interval was contained within a massive sulphide intersection from 674.25 to 705.75 metres downhole over 31.5 metres carrying values of 2.75% Copper, 2.89% Zinc, .036% Cobalt and .53 oz/ton Silver.

Sample preparation and analyses for this release were conducted by Swastika Labs in Swastika, Ontario on split drill core supplied by Millstream. Standards were inserted in the sample sequences with check assays and re-run's routinely conducted. Dave Gamble, P.Geo. and Edward Bettiol, P. Eng, both consultant geologists of Millstream, are the Qualified Persons as described in National Instrument 43-101 for the Potter Mine Project. They have reviewed this report and press release with company management.

Millstream continues drilling to further explore this potentially rich volcanogenic massive sulphide (VMS) type deposit at its Potter Property. The past producing property is host to copper-zinc-cobalt "stacked" mineralized zones located in the highly prolific Abitibi Greenstone Belt in the Kidd-Munro Assemblage near the town of Matheson in north eastern Ontario, Canada. It is the company's ambition to fulfill drilling requirements necessary to estimate a NI 43-101 compliant resource.

The principle objective of Millstream Mines Ltd. is to enhance and develop known mineral properties to production potential.

Millstream seeks safe harbour with regards to forward looking statements.
